

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

EDITORIAL COMMITTEE: S. NEWCOMB, Mathematics; R. S. WOODWARD, Mechanics; E. C. PICKERING, Astronomy; T. C. MENDENHALL, Physics; R. H. THURSTON, Engineering; IRA REMSEN, Chemistry; J. LE CONTE, Geology; W. M. DAVIS, Physiography; O. C. MARSH, Paleontology; W. K. BROOKS, C. HART MERRIAM, Zoology; S. H. SCUDDER, Entomology; C. E. BESSEY, N. L. BRITTON, Botany; HENRY F. OSBORN, General Biology; C. S. MINOT, Embryology, Histology; H. P. BOWDITCH, Physiology; J. S. BILLINGS, Hygiene; J. MCKEEN CATTELL, Psychology; DANIEL G. BRINTON, J. W. POWELL, Anthropology.

FRIDAY, NOVEMBER 19, 1897.

## CONTENTS:

<i>The Importance of Astrophysical Research and the Relation of Astrophysics to other Physical Sciences:</i> JAMES E. KEELEER. ....	745
<i>Mathematics and Astronomy at the American Association for the Advancement of Science:</i> JAMES MCMAHON. ....	755
<i>Singular Stress Strain Relations of India Rubber:</i> R. H. THURSTON. ....	758
<i>Fifteenth Annual Report of the Committee on Indexing Chemical Literature.</i> .....	761
<i>Current Notes on Anthropology:—</i> <i>The Stone Age of Phœnicia; Archæological Survey of Ohio:</i> D. G. BRINTON. ....	762
<i>Notes on Inorganic Chemistry:</i> J. L. H. ....	763
<i>Scientific Notes and News</i> .....	764
<i>University and Educational News.</i> .....	769
<i>Discussion and Correspondence:—</i> <i>Determinate Variation and Organic Selection:</i> J. MARK BALDWIN. <i>Amphibia vs. Batrachia:</i> O. P. HAY. <i>The British and American Associations:</i> MARCUS BENJAMIN. ....	770
<i>Scientific Literature:—</i> <i>Boletín del Instituto Geológico de Mexico:</i> J. J. STEVENSON. <i>Geologic Atlas of the United States.</i> <i>Williams' Inorganic Chemistry and Elements of Chemistry:</i> J. E. G. <i>Congreso Internacional de Americanistas:</i> D. G. BRINTON. <i>Phillips on Totem Tales:</i> FRANZ BOAS. ....	775
<i>Societies and Academies:—</i> <i>New York Section of the American Chemical Society:</i> DURAND WOODMAN. <i>The New York Academy of Sciences, Section of Anthropology and Psychology:</i> C. P. BLISS. ....	779
<i>Scientific Journals</i> .....	779
<i>New Books.</i> .....	780

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison-on-Hudson, N. Y.

## THE IMPORTANCE OF ASTROPHYSICAL RESEARCH AND THE RELATION OF ASTROPHYSICS TO OTHER PHYSICAL SCIENCES\*

THE domains of the physical sciences are not, like the political divisions represented on a map, capable of being defined by boundary lines traced with mathematical precision. They pass into one another by imperceptible gradations, the unity of nature opposing itself to rigid systems of classification. Thus there often exists between two allied sciences a broad ground, belonging to each, yet exclusively the property of neither, which may be so extensive and fertile as to justify the development of a new science for its special cultivation. And such a science not only subserves the purpose for which it was created, but it has the further special importance that, by promoting an exchange of knowledge between its previously established neighbors, by investigating the cause of disagreements between them, by comparing their methods, and possibly by detecting errors in their results, it tends to bring them into more perfect coordination.

Such is the nature of the science which Professor Langley has called the new astronomy, and which is also, and perhaps more generally, known as astrophysics. Its

\*Address delivered at the dedicatory exercises of the Yerkes Astronomical Observatory, of the University of Chicago, Williams Bay, Wis., Thursday, October 21, 1897.
